Groco Mart

Background and Objectives

This is not necessarily bad for long-term growth in online grocery, since it suggests a broader, midmarket hook relevant to many households. But it does suggest that, unlike the iPhone, current digital grocery solutions aren't really innovating much in terms of the grocery shopping experience itself. In order to capture growth, online grocery platforms will need to focus on the following areas:

Target Households: Young urbanites, suburban families, older singles

Meet Underserved Needs: Eliminating the drudgery and inconvenience of constant physical shopping

Look for Cultural Hooks: Encourage the ability to order in the home kitchen, as the need arises as well as enable ordering "on demand" out of the home.

Also look for ways to facilitate democratic grocery shopping across household members to ensure "agreement" and total household satisfaction.

Online grocery shopping ordering potentially reduces the inconvenience of grocery selection by eliminating trips to physical stores. It theoretically enables consumers to shop much more quickly by occasion or for targeted fill-in trips, precisely when a trip to the grocery store is most difficult.

Description of the Modules

Main Section

As the name suggests the Main section is the first page users see when they open our page. With limited functionality the main page shows the title and a top-most navigation bar that stays fixed while user

Contact Us Section

Like the main section, Contact Us section is a descriptive section where user can read about the Store location and all toggle the Read More option to know more about the store and its function.

Categories Section

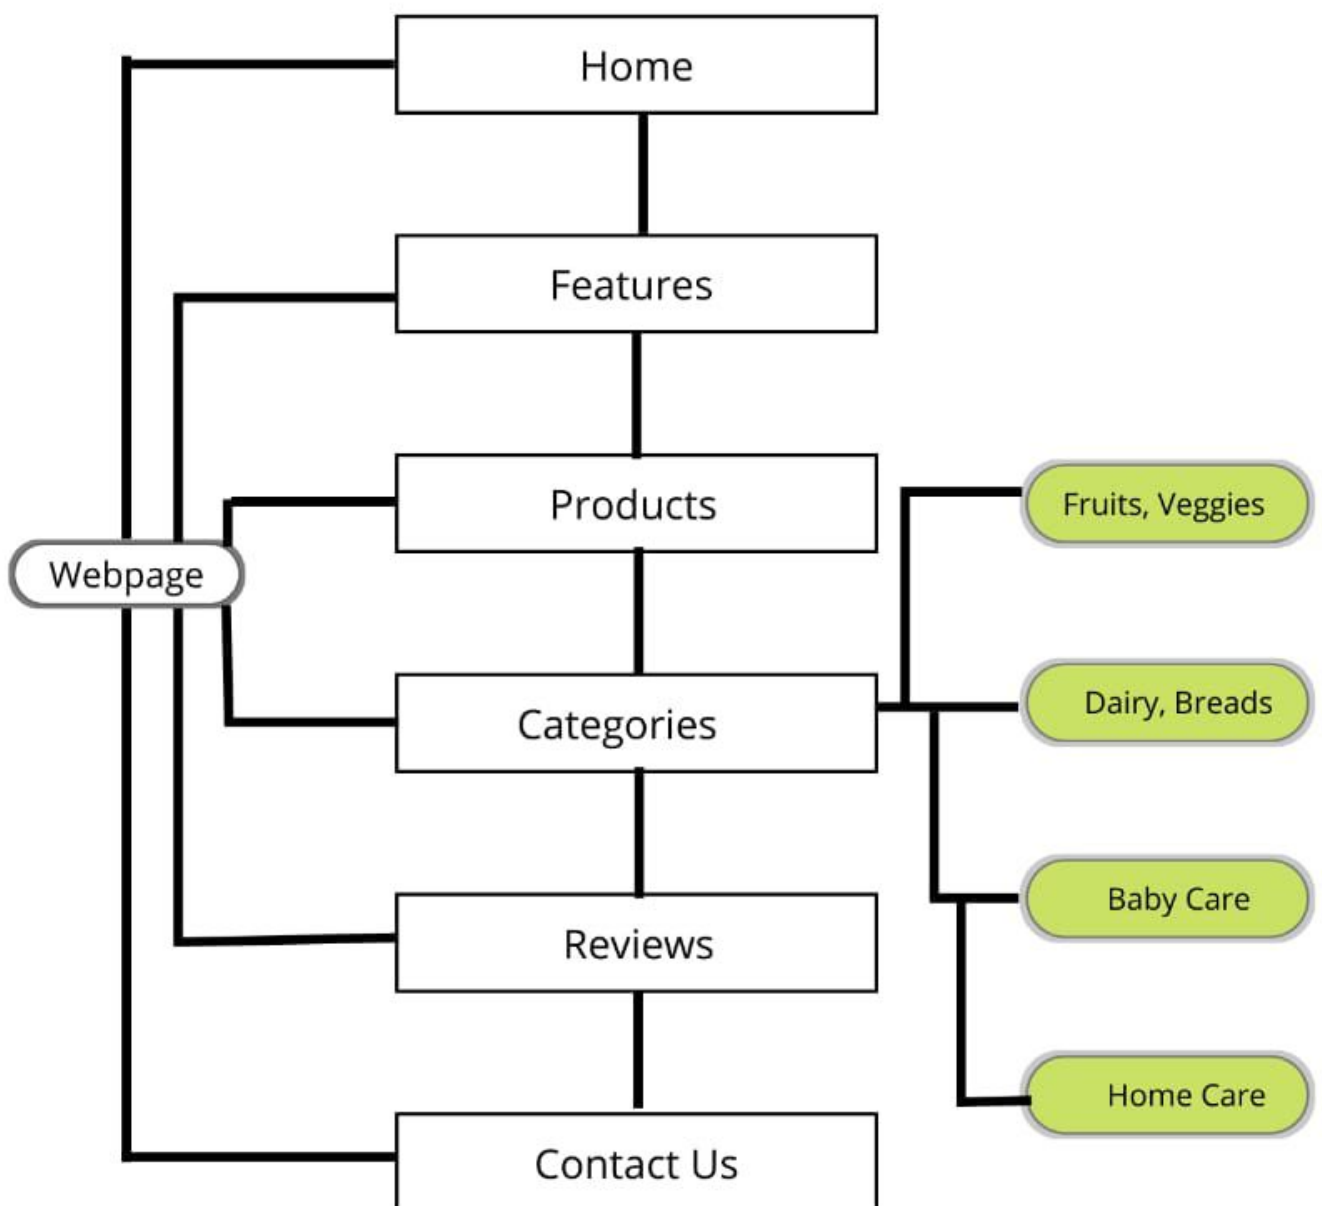

Categories section divide the for html page in their sequential order , by which the user can access the group of items that they particularly need by easy way

Categories

Flowchart of the website

Sections

Role of Each Members

Although we had to connect over the Internet, our group members were in constant contact throughout the project.

We discussed every aspect of the project thoroughly. Despite being differences in knowledge, we made sure each member understood and contributed equally towards the project.

Overall, every member offered equally, below are the key points that each member did :

Harsh Singh

- HTML ,CSS (Index.html, contact us, Fruits & vegetable, Dalry)
- JavaScript of Index.html
- Research work
- Helped in vscode&github
- image in report

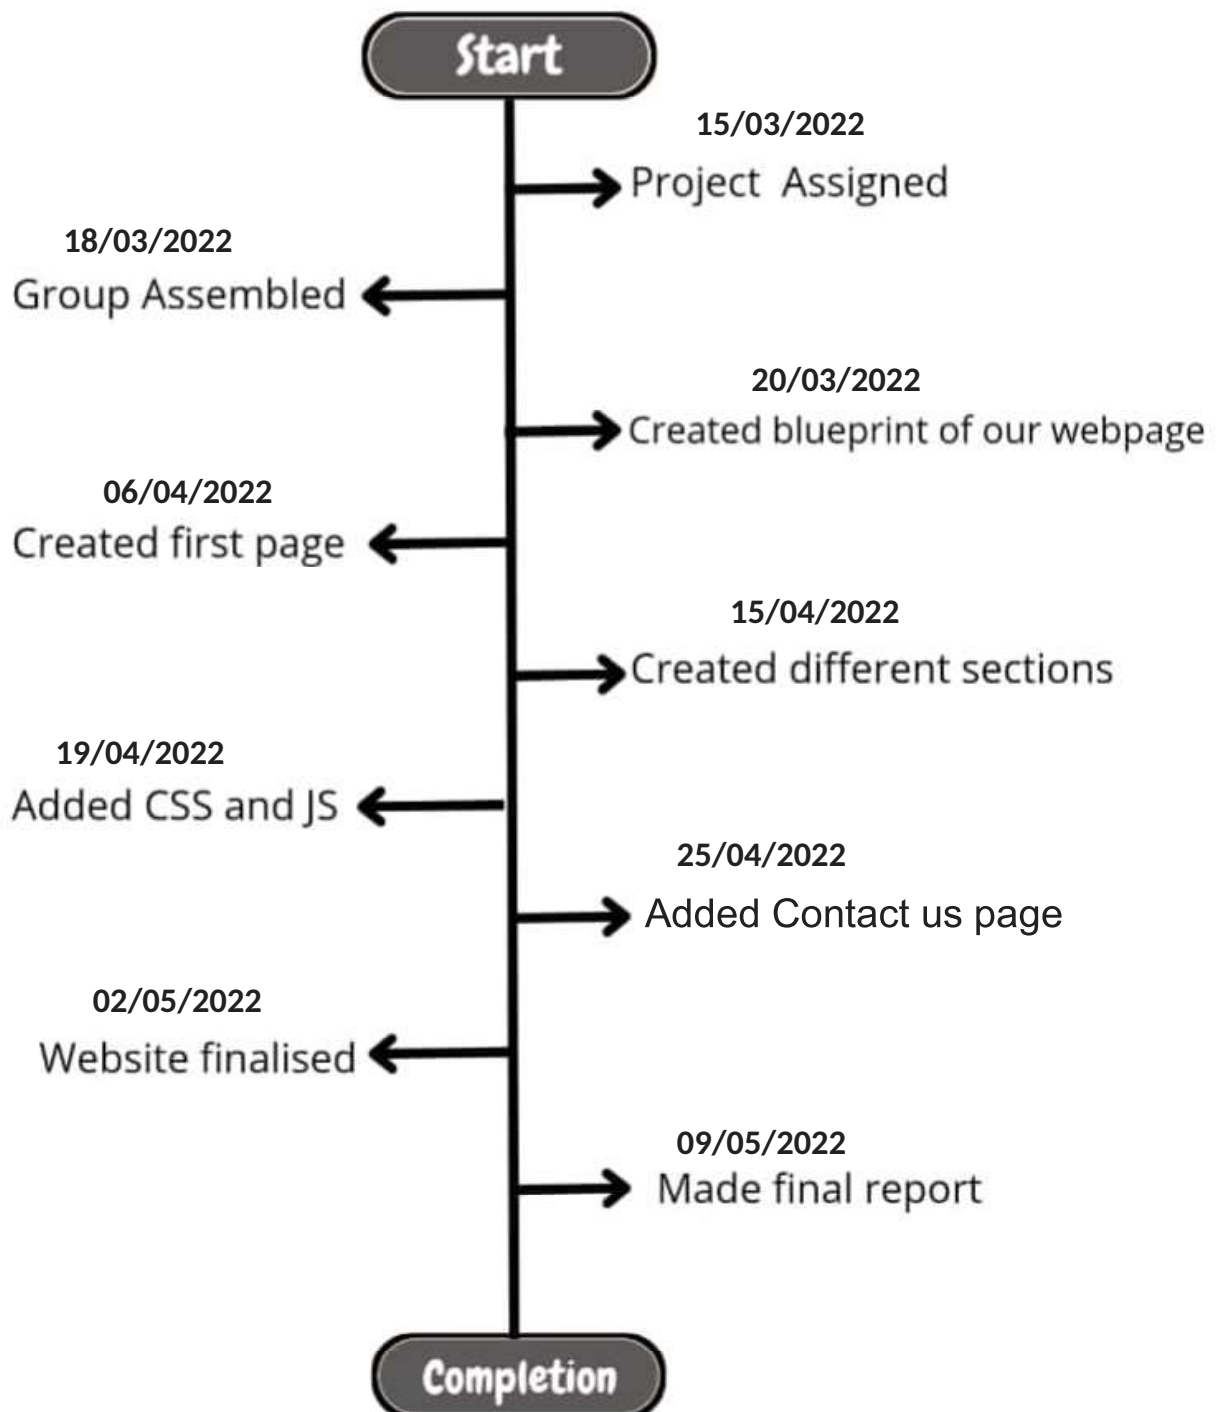

Samriddhi Suman

- Html,Css (Home care.html)
- Image research work
- helped in javascript
- Report work

Aayush kunal Thakur

- Html,Css (Baby care.html)
- Helped in Css
- Helped in research work

Timeline of the project

Implementation of the Project

To create this project, we used Visual Studio Code. The complete website has been created using HTML, CSS, JAVASCRIPT only .

When we received our project, we decided to stick to the layout we were provided with. Therefore, our style tends to be similar to the sample image.

We made our site look as simplistic as possible to create a vivid user experience. The complete website's layout has been created over tables

and common CSS styling such as padding and text formatting. We also used some JavaScript to make the site more intuitive

We also stuck to a single font style and color pallet for the site which are shown below:

Font Style : Poppins

```
@import url('https://fonts.googleapis.com/css2?family=Poppins:wght@100;300;400;500;600&display=swap');

:root{
  --orange: #20369ff0;
  --black: #5b0059;
  --light-color: #360000;
  --box-shadow: 0 .5rem 1.5rem rgb(110 44 240 / 85%);
  --border: .2rem solid rgb(2 40 224);
  --outline: .1rem solid rgb(209 110 25 / 31%);
  --outline-hover: .2rem solid var(--blue);
}
```

Colour : #5b0059

```
:root{
  --orange: #20369ff0;
  --black: #5b0059;
  --light-color: #360000;
  --box-shadow: 0 .5rem 1.5rem rgb(110 44 240 / 85%);
  --border: .2rem solid rgb(2 40 224);
  --outline: .1rem solid rgb(209 110 25 / 31%);
  --outline-hover: .2rem solid var(--blue);
}
```

Site Screenshot:

Technologies and frameworks used:

The website is created in Visual studio and written using :

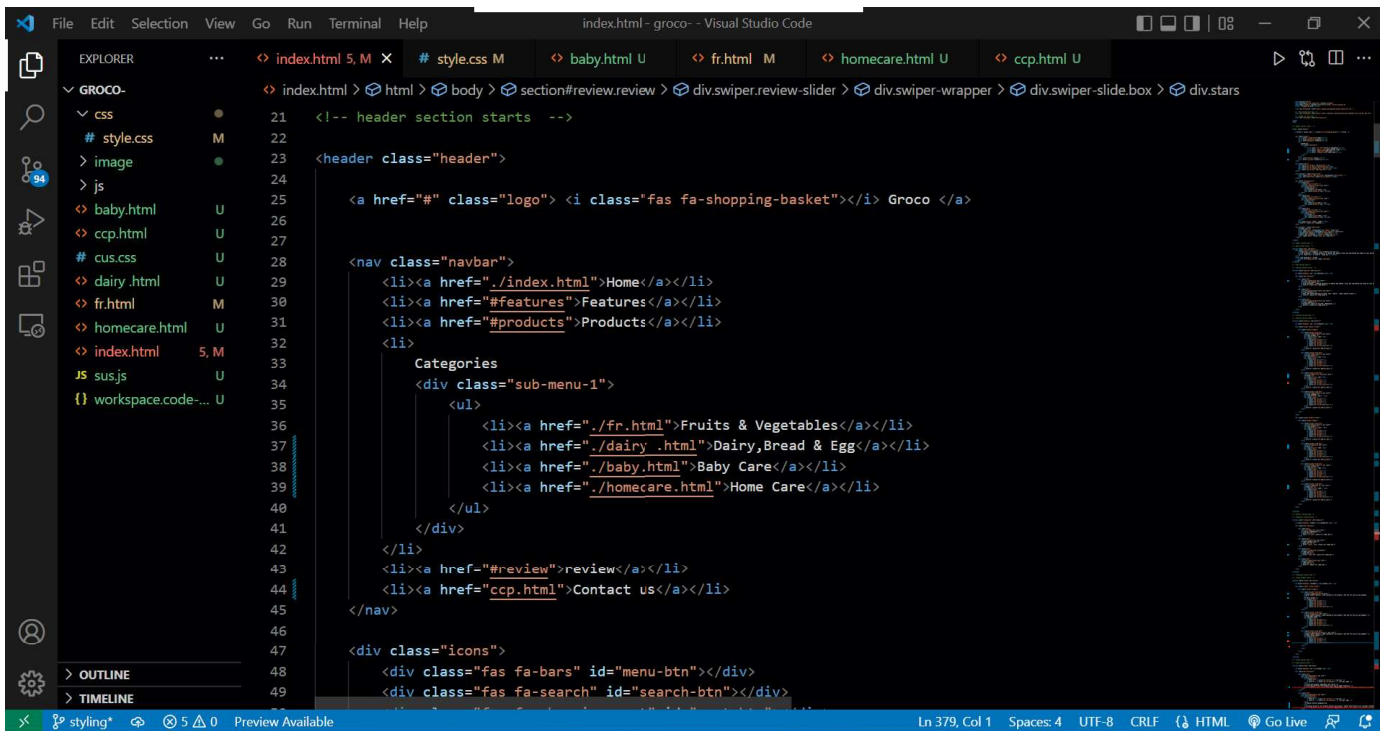

For reference and knowledge, we did use these sites:

- <https://www.w3schools.com/>
- <https://stackoverflow.com/>
- Google Fonts
- Html , Css and Javascript by udemy

Screenshot of our coding screen:

1: Index.html

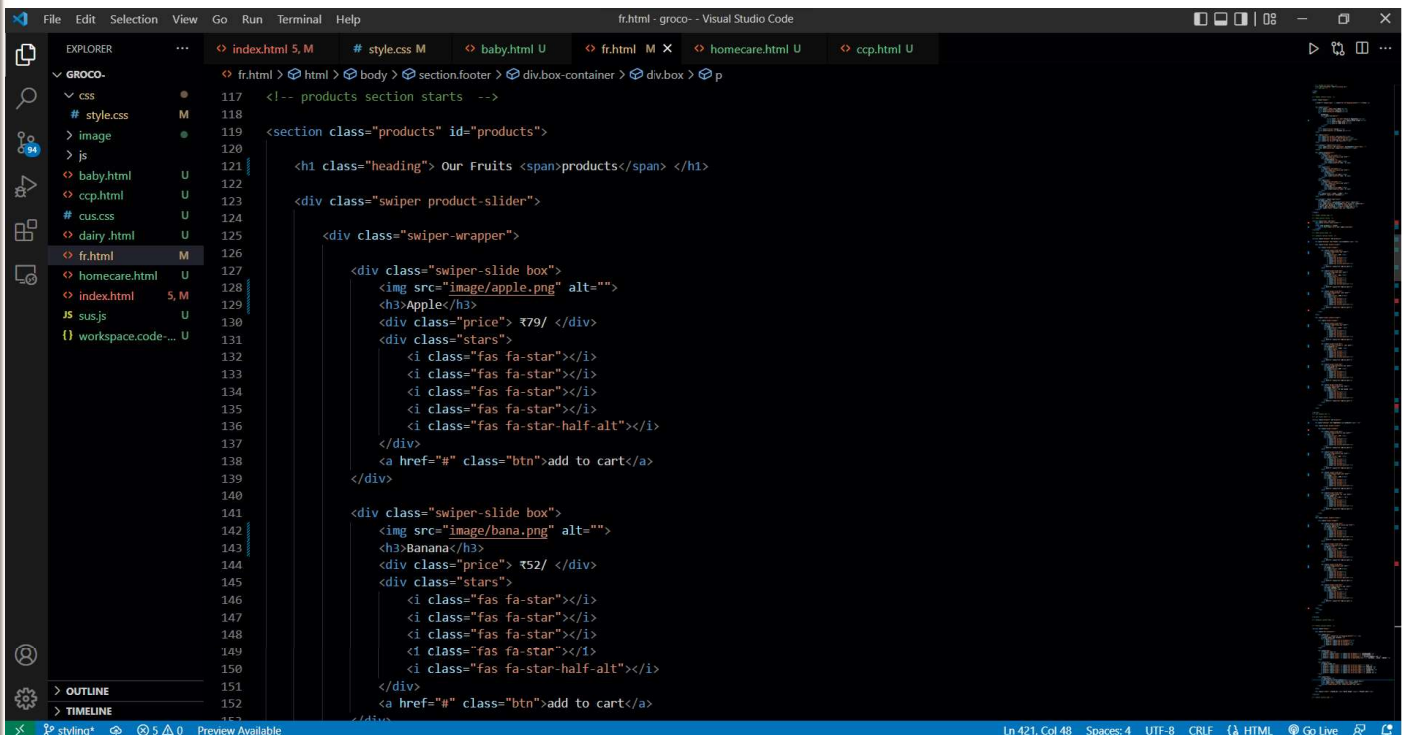

The screenshot shows the Visual Studio Code editor with the 'Index.html' file open. The Explorer panel on the left shows the project structure with files like 'style.css', 'baby.html', 'fr.html', 'homecare.html', and 'ccp.html'. The main editor area displays the HTML code for the index page, including a header with a Groco logo, a navigation bar with links to Home, Features, Products, and a sub-menu for Categories (Fruits & Vegetables, Dairy, Bread & Egg, Baby Care, Home Care), and a footer with a review link and a contact us link.

```
<!-- header section starts -->
<header class="header">
  <a href="#" class="logo"> <i class="fas fa-shopping-basket"></i> Groco </a>

  <nav class="navbar">
    <li><a href="/index.html">Home</a></li>
    <li><a href="#features">Features</a></li>
    <li><a href="#products">Products</a></li>
    <li>
      Categories
      <div class="sub-menu-1">
        <ul>
          <li><a href="/fr.html">Fruits & Vegetables</a></li>
          <li><a href="/dairy.html">Dairy, Bread & Egg</a></li>
          <li><a href="/baby.html">Baby Care</a></li>
          <li><a href="/homecare.html">Home Care</a></li>
        </ul>
      </div>
    </li>
    <li><a href="#review">review</a></li>
    <li><a href="ccp.html">Contact us</a></li>
  </nav>

  <div class="icons">
    <div class="fas fa-bars" id="menu-btn"></div>
    <div class="fas fa-search" id="search-btn"></div>
  </div>
</header>
```

2 : Fruits.html

The screenshot shows the Visual Studio Code editor with the 'fr.html' file open. The Explorer panel on the left shows the project structure with files like 'style.css', 'baby.html', 'fr.html', 'homecare.html', and 'ccp.html'. The main editor area displays the HTML code for the fruits page, including a heading 'Our Fruits', a swiper product slider for Apple and Banana, and a footer with a review link and a contact us link.

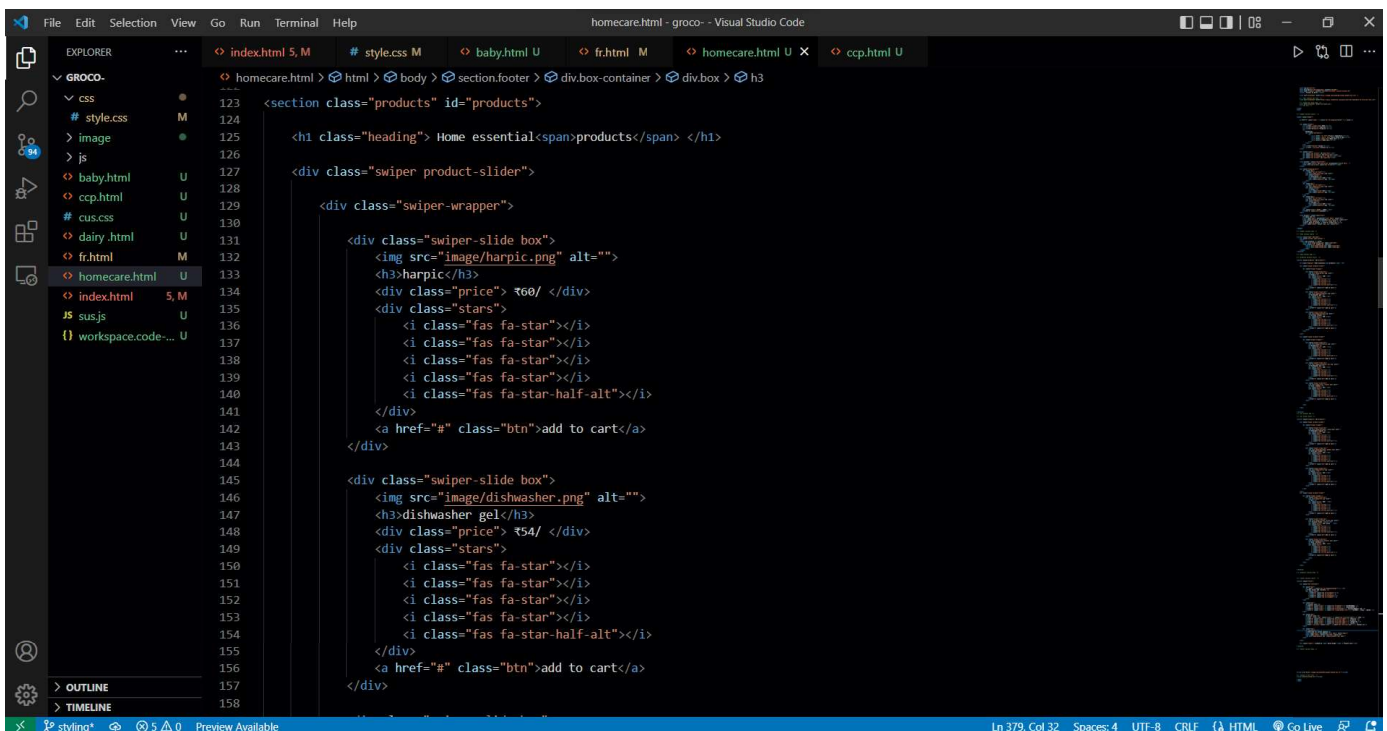

```
<!-- products section starts -->
<section class="products" id="products">
  <h1 class="heading"> Our Fruits <span>products</span> </h1>

  <div class="swiper product-slider">
    <div class="swiper-wrapper">
      <div class="swiper-slide box">
        
        <h3>Apple</h3>
        <div class="price"> ₹79/ </div>
        <div class="stars">
          <i class="fas fa-star"></i>
          <i class="fas fa-star"></i>
          <i class="fas fa-star"></i>
          <i class="fas fa-star"></i>
          <i class="fas fa-star-half-alt"></i>
        </div>
        <a href="#" class="btn">add to cart</a>
      </div>
      <div class="swiper-slide box">
        
        <h3>Banana</h3>
        <div class="price"> ₹52/ </div>
        <div class="stars">
          <i class="fas fa-star"></i>
          <i class="fas fa-star"></i>
          <i class="fas fa-star"></i>
          <i class="fas fa-star"></i>
          <i class="fas fa-star-half-alt"></i>
        </div>
        <a href="#" class="btn">add to cart</a>
      </div>
    </div>
  </div>
</section>
